

# Must-haves for Every Crime Scene Toolkit

Rely on Puritan for your evidence collection and DNA-sampling needs.

## **DNA-FREE SWABS**

Sterile, devoid of amplifiable Human DNA and free from detectable DNase & RNase contaminants.

**Best for:** PCR, molecular assays, DFA, and direct antigen testing.

**Features:** Available in cotton (with and without transport tube), round "lollipop" foam, and PurFlock Ultra® with transport tube.

## **DNA-CONTROLLED SWABS OR FABUSA**

Manufactured in a DNA-controlled environment.

**Best for:** The patented filtered air breathable (FAB) tube allows air in while keeping contaminants out and away from your specimen.

**Features:** Choose from PurFlock Ultra® or cotton (standard or small and pointed) with FAB transport tubes to keep samples safe and dry.

## **CAP-SHURE**

Our unique aerated cap prevents cross-contamination during transport, and can lay flat to dry.

**Best for:** Collection and transport of fragile evidence, such as blood, saliva, latent print residue and other fluids.

**Features:** Available with flock or cotton, the ventilated cap allows undisturbed air-drying during transport – no swab box needed.

## **DRY TRANSPORT SYSTEMS**

Swab and tube systems, convenient for evidence collection and safe transport to the lab.

**Best for:** Convenient for collection and labeling of samples in field, and for protected transport of sample back to the lab.

**Features:** Available with many tip shapes and materials, including cotton, polyester, rayon, foam and our patented flock.

## **STERILE SWABS**

Puritan's broad line of sterile swabs is useful both in the field and the lab.

**Best for:** Ideal for sampling, testing, and collecting various sample types.

**Features:** Available in patented flock, cotton, polyester, and medical-grade foam.

## **CUTICLE STICKS**

A widely used staple in any forensic kit.

**Best for:** Excellent tools for collection of trace DNA evidence found under the fingernails of both victims and suspects.

**Features:** Each stick has double beveled ends and is individually wrapped to prevent cross-contamination.
